

**CARBON MARINE STRUCTURES**

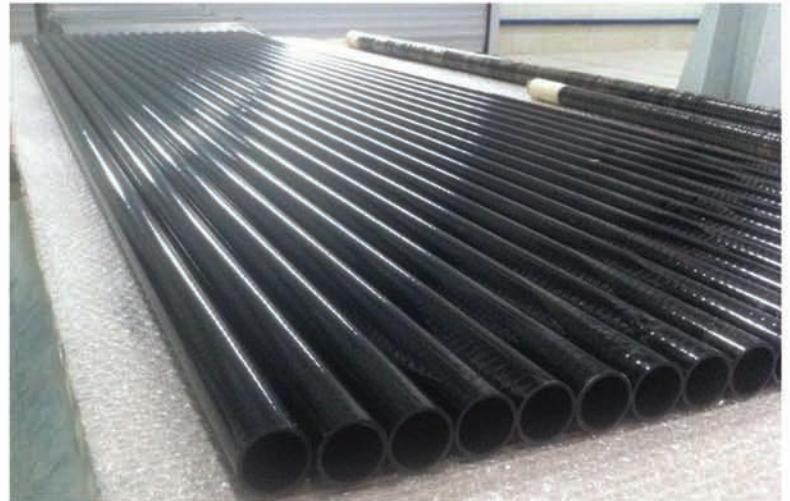

Masts, spinnaker poles, bowsprits are some of the most dynamic components of a yacht. The yacht owners are always in quest of searching even stronger and more competitive goods for their yachts.

**We, in B&T Composites, are proud of our high quality standards and flexible specialized solutions.**

The team of B&T Composites provides innovative solutions, technology-oriented. The rapid technology development have resulted in the creation of high-performance carbon fibre goods, reliable, strong, light and perfectly adapted to the sailboat market.

Our standard range consists of:

- Masts
- Spinnaker poles
- Booms
- Bowsprits
- Drive-shafts
- Sun sail columns
- Tillers
- Pressure housing cylinders

We have an in-depth knowledge of how to combine

- the benefits of carbon fibres (high strength, light weight, stiffness) with
  - the filament winding technique, design and manufacturing
  - the care needed to control each step of the process and
  - the detailed understanding of our customers' requirements
- so as to assure that we provide high-performance products for each marine application.
